TITLE : SOLUBLE ERYTHROPOIETIN RECEPTOR PROTEIN AND GENE CODING ITS AMINO ACID SEQUENCE

ABSTRACT : PURPOSE: To obtain a soluble erythropoietin receptor protein and a gene coding its amino acid sequence.

CONSTITUTION: A DNA sequence having a region from a transmembrane region of gene coding an amino acid sequence of erythropoietin receptor protein to the N end side and its variant. A soluble erythropoietin receptor protein expressed by this DNA sequence, having a binding property in erythropoietin and having an organic antigenicity as erythropoietin receptor. This protein has characteristics as a EPO binding property and EPO receptor antigen and is useful as a medicine, a diagnostic and a biochemical reagent.
